

Community Capital Management, LLC (CCM), an approximately \$7 billion institutional impact investment manager, is seeking a Data and Reporting Analyst in its Fort Lauderdale, FL office. The position will report to the Senior Systems Architect.

Duties and Responsibilities

- **Reporting:** Develop a deep understanding of the Firm’s proprietary investment and Impact data. Design and maintain SQL scripts to enhance and enrich investment datasets. Optimize reporting processes across the firm and support data reconciliations and report generation for monthly and quarterly reporting cycles.
- **Automation:** Design and implement ETL pipelines and other automation solutions to support various departments. Streamline workflows to reduce manual effort and improve overall efficiency.
- **Data Controls and Monitoring:** Build and maintain data control and validation reports in proprietary database. Fulfill data requests from internal teams by extracting financial data from multiple databases and providing support for technical and production-related issues.

Required Qualifications

- Bachelor’s degree, preferably in Computer Science, Data Science, Management Information Systems (MIS), Applied Mathematics, or Finance/Economics with a quantitative focus
- Solid understanding of relational databases, data modeling, and SQL
- High attention to detail and a self-starter
- Excellent organizational skills

How to Apply

For consideration, please send cover letter and resume to jobs@ccminvests.com; reference “**Data & Reporting Analyst**” in the subject line.
