Performance for periods greater than 1-year are annualized. Performance quoted is past performance and does not guarantee future results. Current performance may be lower or higher than the performance data quoted. An investor's investment return and principal value will fluctuate, so that your share when redeemed may be worth more or less than your initial cost. To obtain the most recent month-end standardized performance, call 877-272-1977. Performance reflects fee waivers, which if not in effect, would have decreased performance. The total annual fund operating expenses is 2.85%. The net expense ratio is 2.74% which is the amount the investor would pay. The total annual fund operating expenses after fee waivers and expense reimbursements (other than acquired fund fees and expenses and dividend expense and prime broker fees on securities sold short) is 1.40%. Waivers are contractual and in effect until 9/30/19.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. As of 9/30/18, the CCM Alternative Income Fund was rated against 299 Multialternative funds over the last three years and 160 funds over the last five years. With respect to these Multialternative funds, the CCM Alternative Income Fund received a Morningstar Rating of four stars for the three-year period and four stars for the five-year period.
