

CCM Community Impact Bond Fund

About the Fund

The CCM Community Impact Bond Fund (the Fund) is an investment grade, intermediate duration bond fund that seeks to preserve capital, deliver attractive risk-adjusted returns, provide a high level of current income, and serve as the ballast in a portfolio, all while investing in well-researched bonds that have direct and measurable positive societal impacts. The Fund's impact criteria primarily focus on the use of bond proceeds and documentation of their expected positive environmental and social outcomes, with most bonds qualifying under the Community Reinvestment Act (CRA) of 1977. An additional offering is customization whereby shareholders meeting minimum requirements can tailor their capital to support specific geographies, impact themes, or impact initiatives, a benefit accompanied by customized impact reporting.

The Fund invests in securities that we consider to be fossil fuel free. We may invest in a bond whose use of proceeds will be used to finance activities or projects in clean and renewable energy, or other activities that may contribute to the transition to a more sustainable economy, even if the issuer's revenue or profits are partially derived from the fossil fuel sector.

Single Family Mortgage Bonds

Colorado | Sector: Taxable Municipals

The Colorado Housing and Finance Authority (CHFA)⁴ will use the bond proceeds indirectly through the acquisition of certain portfolios of mortgage-backed securities guaranteed by the Government National Mortgage Association and finance certain second mortgage loans. Under the CHFA's Single Family Mortgage Program (the Program), the CHFA may make mortgage loans for single-family residential dwellings directly to individual borrowers or may purchase such mortgage loans from qualified origination mortgage lenders. The CHFA currently operates both Qualified (tax-exempt) and Non-Qualified (taxable) Programs. The mortgages loans financed with the proceeds will be originated under the CHFA's Non-Qualified Program. The CHFA has established programs to allow borrowers to finance all or a portion of the closing costs and down payment requirements with respect to mortgage loans originated under the Program. Under most of the CHFA's programs, second mortgage loans can be originated for up to 4% of the first mortgage loan amount with a term of 30 years and a stated rate of interest of 0%.

Applicants for mortgage loans originated under most Programs are required by the CHFA to complete a homebuyer education class. Homebuyer education classes are offered at no cost and are intended to give applicants a clearer understanding, among other things, of their debt obligations. Homebuyer education classes are offered in both English and Spanish and include key information related to interest rates, borrowers' rights, the role of the lender, and more.

“CHFA's mission is to strengthen Colorado by investing in affordable housing and community development. Their vision is that everyone in Colorado will have the opportunity for housing stability and economic prosperity.”

This fund involves impact and ESG Risk. The Adviser may select or exclude securities of certain companies for reasons other than performance and, as a result, the Fund may underperform other funds that do not use an impact and ESG screening process. Impact and ESG investing is qualitative and subjective by nature. There is no guarantee that impact and ESG criteria used by the Adviser will reflect beliefs or values of any particular investor.

Community Capital Management, LLC (CCM) is an investment adviser registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration as an investment adviser does not imply a certain level of skill or training. The verbal and written communications of an investment adviser provide you with information you need to determine whether to hire or retain the adviser. Past performance is not indicative of future results. CCM has distinct investment processes and procedures relating to the management of investment portfolios for institutional clients. The firm's strategies are customized, rather than model-based, and utilize an innovative approach to fixed income and equity by combining the positive outcomes of impact and environmental, social, and governance (ESG) investing with rigorous financial analysis, an inherent focus on risk management, and transparent research. Bonds are subject to interest rate risk and will decline in value as interest rates rise. Stocks will fluctuate in response to factors that may affect a single company, industry, sector, or the market as a whole and may perform worse than the market. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for a client's investment portfolio. A sustainable investment strategy that incorporates ESG criteria may result in lower or higher returns than an investment strategy that does not include such criteria.
